DETAILED ACTION

Any rejections and/or objections, made in the previous Office Action, and not repeated below, are hereby withdrawn.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Labino et al. (US Patent No. 3,138,561).

Labino et al. discloses a glass composition having overlapping ranges of components with the glass compositions recited in instant claims 9 and 10. See col. 4, lines 15-20. Overlapping ranges have been held to establish *prima facie* obviousness. See MPEP 2144.05.

The reference does not disclose the properties recited in claim 11, however, one of ordinary skill in the art would expect that the overlapping portion of the glasses would have the same properties.

Art Unit: 1755

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Labino et al. (US Patent No. 3,138,561) as applied to claims 9 and 10 above, and further in view of Volf, Chemical Approach to Glass.

As noted above, Labino et al. discloses a glass having overlapping ranges of components with the glass of instant claims 9 and 10.

The reference differs from claim 13 by failing to disclose the inclusion of F, TiO_2 or As_2O_3 . However, it was well-known to one of ordinary skill in the art to have added F and/or As_2O_3 to a glass as a fining agent, i.e. a component that reduces bubbles. See pages the section bridging pages 471-472 and page 568 of Volf.

Therefore, it would have been obvious to one one of ordinary skill in the art at the time the invention was have added F and/or As_2O_3 to the glass of Labino et al. because the resultant glass would have fewer bubbles.

Response to Arguments

Applicant's arguments with respect to claims 9-11 and 13 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claim 14 is allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
